Good art. Beautifully printed.

A few thoughtful steps from your digital edition to your everyday home.

01 Choose your file.

Unzip your download. Choose the 5 x 7 inch, 8 x 10 inch, or A4 PDF for your frame. The A4 version has a white border. The JPG is available if your print service requests an image. Generative editions also include SVG and PNG files.

02 Find a paper you love.

Try matte fine-art or lightly textured paper, around 200–300 gsm. A warm white gives a gentle, earthy feel. Always test a small print before a final run.

03 Keep your settings simple.

Print at 100% / actual size. Turn off fit to page and automatic color enhancement. Select the correct paper type. Screen and print colors may look different.

04 Let a local printer help.

Take your PDF to a print shop you trust. Ask about paper, colors, trimming, and a test print. Check the source-quality note below and your edition guide before enlarging.

05 Make it your own.

Choose a favorite frame and give the piece a little breathing room. Keep paper prints away from moisture and direct sun. Back up your digital files somewhere safe.

Quality: Built-in generative editions include native vector SVGs and artwork PDFs, plus 2400 x 3000 raster exports. Original AI-assisted editions are upscaled from 1122 x 1402 and best at 8 x 10 in or smaller. Optional image-AI editions are raster-based: see their guide and source dimensions. No physical product. Personal use only; no resale or file sharing.
